

Envirolok Part Sun, No Water Mix

Hoary Vervain; Pale Purple Coneflower; Black-eyed Susans

This seed mix contains 11 grass species, 4 sedge species, and 35 wildflower species.

These species thrive with a minimum of 50% sunlight received during the day. The primary source of moisture is from rainfall or watering only – this wall is not near a body of water.

The species selected all have extensive root systems. Some are very deep rooted to add structural strength to the bank while others have shallower fibrous root

systems that protect the soil surface.

The mix has enough diversity to ensure flowers from spring to late fall. The stature of the species contained in the mix ranges from 8-12 inches up to 6 feet in height.

Partial Sun

<p>Coverage Area 500 sq. ft</p>
<p>Seeds 120 per sq. ft</p>
<p>PLS Weight 7.205 Ounces</p>
